

Well I only have 3 of my own Alpacas at this point so I've decided to have last years clip spun. I'm just not certain what yet to have it spun into. ie. weight etc. Anyone out there have a good idea what is the best weight to have done as far as what is the most useful? I have a few people who are knitters in the family, maybe I should ask them what they use, but really wanted to give it to them as a gift. Ideas would be appreciated.
